

CAPE FEAR ACADEMY

Ready. Set. Go Further.

MATH FLOW CHART

Grade

The math department at Cape Fear Academy has carefully considered the scope and sequence of course offerings. Starting in 6th grade, if developmentally and academically prepared, students have the opportunity to take more challenging math classes that will prepare them for the challenge of AP courses and exams. At the same time, it is possible for students to switch tracks if they meet their math milestone later in Middle School or Upper School. This pacing guide leads to a deeper understanding of mathematical concepts and to outstanding AP scores.
